

FAQs

What is ORCID?

Open Researcher and Contributor ID (ORCID) is a not-for-profit organization that provides persistent unique identifiers for researchers, much like a DOI does for a published article. Researchers can sign up for an ORCID for free via an easy registration process on orcid.org or via ScholarOne or the Author Gateway. Learn more at <http://orcid.org/content/about-orcid>, in the graphic on the last page of this document, or at <https://vimeo.com/97150912>.

Do co-authors need ORCIDs?

ORCIDs for co-authors are encouraged. Corresponding authors can ask their co-authors to link their ScholarOne accounts to their ORCIDs.

How is the ORCID collected?

Both ScholarOne and the Author Gateway collect ORCIDs via a link out to orcid.org. The user is returned to their previous screen after the ORCID is collected and verified. ORCIDs cannot be entered manually; this ensures that the ORCID is valid.

Why is IEEE implementing this policy?

ORCID disambiguates author names, allowing for accurate attribution and improved discoverability.

Does the author need to add their ORCID to every manuscript they submit?

The author needs to add their ORCID only once per ScholarOne site. If the author has an account on another journal's ScholarOne site, then the author will follow the same process for that journal.

Who can I contact for more information?

Please contact Tiffany McKerahan, Author Engagement and Support Manager, at t.mckerahan@ieee.org.
